TABLES .....	viii
ABSTRACT .....	1
1. INTRODUCTION .....	1
1.1 Background and Terminology .....	2
1.1.1 Noise Voltage Representations .....	2
1.1.2 Instantaneous Noise Power .....	2
1.1.3 Statistics of Instantaneous Noise Power .....	3
1.1.4 Average Noise Power .....	4
1.1.5 Antenna Average Noise Power .....	5
1.1.6 Noise Power Statistics .....	5
1.2 Predicted Noise Power .....	6
2. MEASUREMENTS .....	7
2.1 Frequencies .....	7
2.2 Measurement Sites and Duration .....	7
2.3 Equipment .....	8
2.4 Data Acquisition .....	10
3. DATA .....	11
3.1 APD .....	11
3.2 24-hour Summaries .....	18
4. RESULTS .....	25
5. CONCLUSIONS .....	29
6. REFERENCES .....	30
APPENDIX: NOISE MEASUREMENT SYSTEM SPECIFICATIONS .....	31

## FIGURES

	Page
Figure 1. Natural and man-made antenna noise figures .....	7
Figure 2. Block diagram of noise measurement system .....	8
Figure 3. Block diagram of spectrum analyzer shown in Figure 2 .....	8
Figure 4. APD of system noise power at 137.5 MHz with residential equipment configuration. Gain and noise figure are 44.7 dB and 1.8 dB respectively .....	10
Figure 5. 137.5 MHz noise from measurements at Lakewood, Colorado residence on Tuesday, April 27, 1999 at 10:28:26 AM. Noise figure is 10.0 dB .....	12
Figure 6. 137.5 MHz noise from measurements at Boulder, Colorado residence on Friday, May 21, 1999 at 03:38:55 PM. Noise figure is 8.1 dB .....	12
Figure 7. 137.5 MHz noise from measurements at downtown Boulder, Colorado on Friday, July 9, 1999 at 11:06:35 AM. Noise figure is 25.8 dB .....	13
Figure 8. 137.5 MHz noise from measurements at downtown Denver, Colorado on Monday, August 30, 1999 at 10:52:04 AM. Noise figure is 16.7 dB .....	13
Figure 9. 402.5 MHz noise from measurements at Lakewood, Colorado residence on Wednesday, May 26, 1999 at 12:57:44 PM. Noise figure is 1.7 dB .....	14
Figure 10. 402.5 MHz noise from measurements at Boulder, Colorado residence on Thursday, May 13, 1999 at 12:58:50 PM. Noise figure is 2.3 dB .....	14
Figure 11. 402.5 MHz noise from measurements at downtown Boulder, Colorado on Thursday, July 1, 1999 at 12:51:52 PM. Noise figure is 3.1 dB .....	15
Figure 12. 402.5 MHz noise from measurements at downtown Denver, Colorado on Wednesday, August 25, 1999 at 09:52:57 AM. Noise figure is 8.6 dB .....	15
Figure 13. 761.0 MHz noise from measurements at Lakewood, Colorado residence on Thursday, April 29, 1999 at 11:55:15 AM. Noise figure is 2.8 dB .....	16
Figure 14. 761.0 MHz noise from measurements at Boulder, Colorado residence on Wednesday, May 19, 1999 at 12:56:22 PM. Noise figure is 2.1 dB .....	16

## FIGURES (cont.)

	Page
Figure 15. 761.0 MHz noise from measurements at downtown Boulder, Colorado on Monday, July 5, 1999 at 02:55:56 PM. Noise figure is 2.5 dB .....	17
Figure 16. 761.0 MHz noise from measurements at downtown Denver, Colorado on Friday, August 27, 1999 at 07:31:10 PM. Noise figure is 2.5 dB .....	17
Figure 17. 137.5 MHz median, mean, and peak power at Lakewood, Colorado residence on Tuesday, April 27, 1999 .....	19
Figure 18. 137.5 MHz median, mean, and peak power at Boulder, Colorado residence on Friday, May 21, 1999 .....	19
Figure 19. 137.5 MHz median, mean, and peak power at downtown Boulder, Colorado on Friday, July 9, 1999 .....	20
Figure 20. 137.5 MHz median, mean, and peak power at downtown Denver, Colorado on Monday, August 30, 1999 .....	20
Figure 21. 402.5 MHz median, mean, and peak power at Lakewood, Colorado residence on Wednesday, May 26, 1999 .....	21
Figure 22. 402.5 MHz median, mean, and peak power at Boulder, Colorado residence on Thursday, May 13, 1999 .....	21
Figure 23. 402.5 MHz median, mean, and peak power at downtown Boulder, Colorado on Thursday, July 1, 1999 .....	22
Figure 24. 402.5 MHz median, mean, and peak power at downtown Denver, Colorado on Wednesday, August 25, 1999 .....	22
Figure 25. 761.0 MHz median, mean, and peak power at Lakewood, Colorado residence on Thursday, April 29, 1999 .....	23
Figure 26. 761.0 MHz median, mean, and peak power at Boulder, Colorado residence on Wednesday, May 19, 1999 .....	23
Figure 27. 761.0 MHz median, mean, and peak power at downtown Boulder, Colorado on Monday, July 5, 1999 .....	24

## FIGURES (cont.)

	Page
Figure 28. 761.0 MHz median, mean, and peak power at downtown Denver, Colorado on Friday, August 27, 1999 .....	24
Figure 29. Cumulative distributions of 137.5 MHz residential median, mean, and peak power .....	26
Figure 30. Cumulative distributions of 137.5 MHz business median, mean, and peak power .....	26
Figure 31. Cumulative distributions of 402.5 MHz residential median, mean, and peak power .....	27
Figure 32. Cumulative distributions of 402.5 MHz business median, mean, and peak power .....	27
Figure 33. Cumulative distributions of 761.0 MHz residential median, mean, and peak power .....	28
Figure 34. Cumulative distributions of 761.0 MHz business median, mean, and peak power .....	28

## TABLES

	Page
Table 1. Natural and Man-made $F_{am}$ (dB above $kT_0b$ ) at Measurement Frequencies .....	6
Table 2. System Noise Figures (dB above $kT_0b$ ) .....	9
Table 3. Measured $F_m$ for All Frequencies and Environments .....	25
